PRODUCTION MECHANICAL ENGINEER | QUALITY ENGINEER

Results-driven Production Mechanical Engineer with 2 years of experience in optimizing manufacturing processes, improving product quality, and enhancing operational efficiency. Proven track record in project management, equipment design, and troubleshooting with a strong focus on cost reduction and continuous improvement. Adept at collaborating with cross-functional teams to drive innovative solutions and achieve production goals.

STRENGTHS AND EXPERTISE

Equipment Design & Maintenance	Technical Documentation	Failure Mode and Effects
Technical Troubleshooting	Corrective Actions	Analysis (FMEA)
Team Collaboration & Leadership	Data Analysis & Reporting	7 QC Tools
ISO Standards Compliance	Cost Reduction Strategies	Lean Manufacturing

PROFESSIONAL EXPERIENCE

Aqualine Water Treatment LLC - UAE

March 2024 - Present

Technical/Sales Support Engineer

Deep understanding of the company's products and services, including technical specifications, features, and benefits. Acquired ability to provide technical solutions and recommendations tailored to customer needs and deliver compelling presentations and demonstrations to clients, showcasing the technical advantages and applications of the products.

Accomplishments:

- Provided technical support to resolve client issues, including product setup, configuration, and troubleshooting, resulting in 10% increase sales in the month of JULY 2024.
- Created technical data sheets, and installation guides, improving the clarity and accessibility of information for customer and sales teams.
- Successfully converted 25% of leads into sales through effective solution selling and personalized support.

Toyoflex Cebu Corporation (Asahi Intecc Group) - Philippines

December 2021 - January 2024

Production Mechanical Engineer / Quality Engineer

Accomplishments:

- Assisted senior engineers in the design and testing of new production line, contributing to the successful launch of new product called BOA Coated Wire Rope.
- Participated in quality control inspections and ensured compliance with industry standards and regulations.
- Conducted root cause analysis for equipment failures and implemented corrective actions, reducing maintenance costs by 10%.
- Implemented Lean Manufacturing principles to streamline operations, leading to a 30% reduction in waste and a 100% improvement in product quality.
- Developed and maintained detailed technical documentation, including equipment specifications, maintenance procedures, and process guidelines to be used by operators in production line.
- Designed a Jig for production line, resulting in 10% increase in production efficiency and a 10% reduction in downtime.

Alberto Booc Sr. Machine Shop and Development INC. - Philippines
Machine Inspector

August 2020 - November 2021

Proven expertise in conducting inspections, identifying defects, and implementing corrective actions to maintain operational standards and improve equipment performance in a machine shop environment.

Accomplishments:

- Conduct comprehensive inspections of various machinery, including CNC machines, lathes, and mills, to ensure adherence to specifications and quality standards.
- Performed regular calibration and maintenance of inspection tools and machinery, ensuring accurate measurements and optimal performance.
- Maintained detailed inspection records and reports, providing actionable insights and recommendations for equipment improvements and maintenance strategies.
- Identified and documented defects, wear, and tear in machinery components. Collaborated with maintenance teams to address issues and procurement department for spare-parts.
- Utilized advanced diagnostic tools and techniques to identify root causes of machinery defects, such as misalignment and wear, and implemented corrective actions to resolve issues and prevent future occurrences.

Crystal Sugar Milling Company - Philippines
On The Job Trainee - Plant Mechanical Engineer

June 2018 - September 2018

Enthusiastic and detail-oriented Plant Mechanical Engineer Trainee with a solid foundation in mechanical engineering principles and hands-on experience in a plant environment. Eager to apply technical skills and knowledge to contribute to efficient plant operations and continuous improvement.

Accomplishments:

- Assisted senior engineers with routine maintenance and repair tasks on plant machinery, including pumps, compressors, and conveyors, contributing to a reduction in downtime.
- Supported daily operations by monitoring equipment performance, assisting in the implementation of process improvements, and contributing to optimization projects aimed at enhancing efficiency and reducing downtime.
- Actively engaged in training sessions and workshops to enhance technical knowledge and skills. Applied learning to real-world scenarios to support plant operations and projects.

EDUCATION

Central Mindanao University , Philippines
Graduate Diploma in Mechanical Engineering
Year 2014 - 2019
